## **BIOIDENT Technologies opens U.S. Headquarters**

### **By Staff**

BIOIDENT Technologies Inc. has opened its headquarters in Menlo Park, Calif. The company also announced that it has appointed two executives who bring deep expertise in nanotechnology, printed organic semiconductors and biophotonics to BIOIDENT—Dr. Wasiaq Bokhari, CEO and Dr. Max Sonnleitner, CTO.

BIOIDENT leverages printed optoelectronics and microfluidics to create a new class of photonic lab-on-a-chip systems, which enable real-time, multiparameter detection and analysis capability for mobile field, diagnostic and point of care applications. BIOIDENT's lab-on-a-chip systems will be used for mobile water and food analysis, chemical and biological agent detection and in-vitro diagnostics. These combined markets currently represent a \$ 7.5 billion addressable opportunity for BIOIDENT.

BIOIDENT is a subsidiary of NANOIDENT Technologies AG. NANOIDENT's divisions include NANOIDENT ORGANIC FAB, GmbH and NANOIDENT Biometrics, GmbH.
